

COMPANY PROFILE · NASHIK

ELECTRICAL · AUTOMATION · MAINTENANCE

# YOGANAND ELECTRICALS & AUTOMATION

Installation, integration and  
maintenance engineering for  
manufacturing plants plus certified  
technical manpower.

THE SOUL OF AUTOMATION

## 01 — WHAT WE DO

# Our Services

Ten service lines covering the full life of plant equipment — install, integrate, maintain and optimise.

01

**Machine Electrical & Mechanical Maintenance**

CNC, VMC and SPM machines.

02

**Utility Maintenance**

Substation, UPS, generator, compressor, chiller, dryer, ETP/STP, RO, cooling tower, fire pump house, forklift.

03

**Control, MCC, PCC, PLC & Relay Logic Panels**

Maintenance and manufacturing.

04

**Industrial LT/HT Maintenance & Wiring**

Up to 11 kV / 33 kV.

05

**PLC Machine Maintenance**

Commissioning and integration.

06

**Hydraulics & Pneumatics Maintenance**

Power packs, valves, FRL units and lines.

07

**Solar Operation & Maintenance**

Ongoing O&M for solar installations.

08

**Electrical Sales & Services**

Components, panels and after-sales service.

09

**Energy Management Systems**

Energy-saving projects, metering and SCADA monitoring.

10

**AMC Contracts**

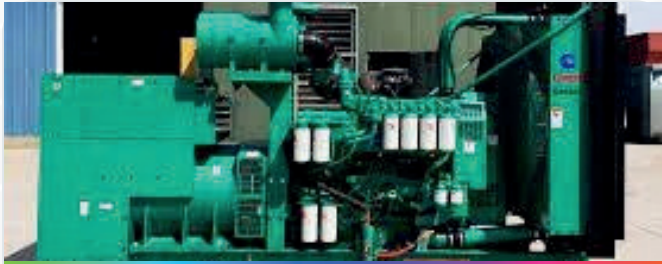

Annual maintenance for machine and utility areas.

## 01 — UTILITY MAINTENANCE

# Utility Equipment We Maintain

The plant systems behind every production line — kept running through preventive schedules, breakdown support and AMC contracts.

**01 Generators**

DG sets and AMF panels — load testing, synchronisation, battery and fuel-system checks.

**02 Compressors**

Screw and reciprocating units — pressure, oil, filters, dryers and leakage control.

**03 Water chillers**

Chilled-water plants — VFD flow control and temperature / pressure logic.

**04 Air-cooled chillers**

Condenser fans, motors, drives and controller servicing.

**05 Substations**

11 kV / 33 kV HT & LT switchgear, transformers, earthing and thermography.

**06 MCC / PCC panels**

Manufacturing, retrofits, power & control wiring and panel audits.

## ALSO MAINTAINED

UPS systems

Dryers

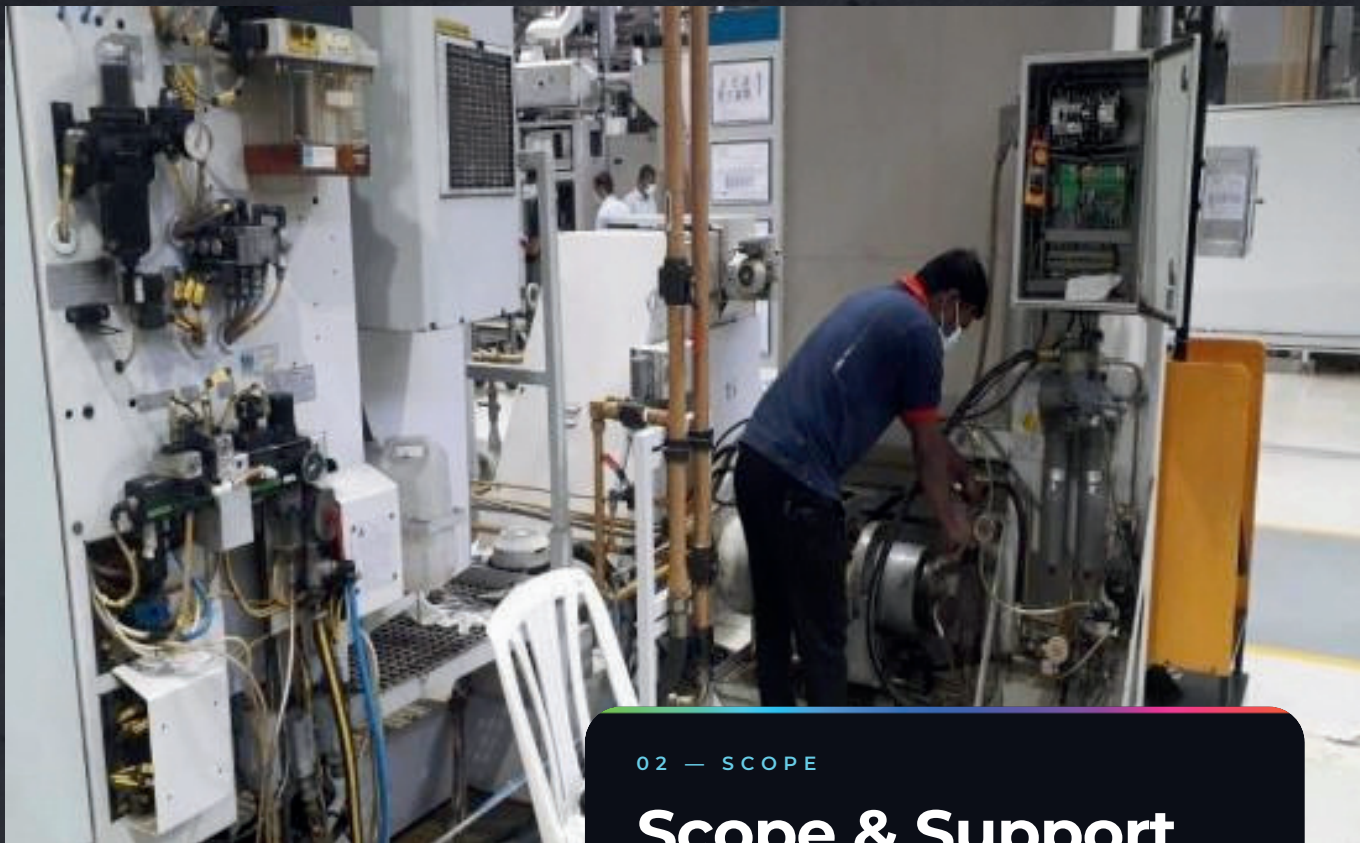

ETP / STP

RO plants

Cooling towers

Fire pump houses

Forklifts

## 02 — SCOPE

## Scope & Support

A pro-active approach that reduces line breakdown time.

01 Electrical & Mechanical PMI Activity

02 Machine Breakdown Maintenance Support

03 Shutdown Plan Work Activity

04 Machine Installation & Commissioning

05 Machine Integration & Upgradation

06 New Plant Electrical Installation & Wiring

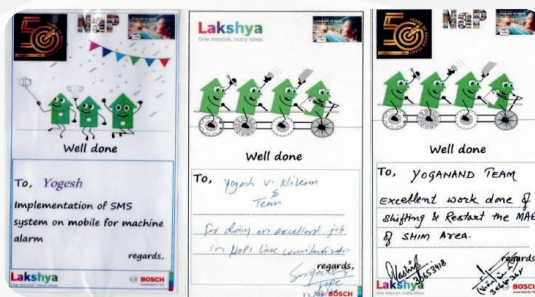

07 Electrical Sales & Services

## 02 — ON THE SHOP FLOOR

# Machine Maintenance Support

A pro-active approach that reduces line breakdown time — our teams on site, and the recognition they've earned from clients.

## 03 — WORKFORCE

# Technical Manpower Solutions

Empowering industries with skilled engineering talent. We deploy qualified, certified and experienced professionals to MNCs and leading private limited companies — from shop-floor execution to engineering supervision.

**MAINTENANCE · ELECTRICAL****Electrical Maintenance**

PLC troubleshooting, industrial automation, control panel wiring and power distribution systems.

**MAINTENANCE · MECHANICAL****Mechanical Maintenance**

Hydraulics, pneumatics, heavy machinery overhauling, breakdown analysis and preventive maintenance.

**PRODUCTION****Production Engineering**

Engineers and supervisors who manage assembly lines, optimise cycle times, reduce wastage and hit daily targets.

**QA / QC****Quality Assurance & Control**

Inspectors and engineers versed in drawings, metrology, root-cause analysis and international quality standards.

**Deployed technicians****Electrical maintenance****Mechanical maintenance****WHY PARTNER WITH US****100% Statutory Compliance**

Strict adherence to labour laws, ESIC, PF and industrial safety regulations.

**Zero-Downtime Guarantee**

Quick replacement deployment so your production lines never stop.

**Industry-Ready Workforce**

Pre-screened, trained personnel for modern, fast-paced manufacturing.

## 04 — COMPLIANCE

# Legal Employee Compliance

Every person we deploy is employed, insured and trained to statutory standard.

**01 Salary as per Minimum Wages Act**

Skilled and highly skilled grades.

**02 Provident Fund (PF)**

Registered and remitted monthly.

**03 ESIC**

Employee state insurance coverage.

**04 Health Insurance**

New India Corona Kavach policy — ₹5 lakh.

**05 Yearly Bonus**

As per number of working days.

**06 Payment Slip**

Issued for every pay cycle.

**07 Attendance Tracking**

Biometric punching or register entry.

**08 Uniform**

Issued to all deployed staff.

**09 Safety Shoes**

Mandatory PPE on site.

**10 Yearly Medical Fitness Check-up**

Annual health screening.

**11 Electrical & General Safety Training**

Before and during deployment.

Uniform & safety shoes

Safety training

## 05 — PLATFORMS

# Systems We Work On

|                         |                                                             |
|-------------------------|-------------------------------------------------------------|
| <b>Siemens PLC</b>      | S7-200 / 300 / 400 / 1200 / 1500                            |
| <b>Siemens Software</b> | SIMATIC Manager, TIA Portal                                 |
| <b>Bosch PLC</b>        | Programming and maintenance                                 |
| <b>ABB PLC</b>          | Programming and maintenance                                 |
| <b>Siemens CNC</b>      | Sinumerik 802D / 840D                                       |
| <b>Fanuc CNC</b>        | Fanuc CNC systems                                           |
| <b>VFD / AC Drives</b>  | Mitsubishi, Siemens, ABB, Delta, Danfoss, Emerson, Indramat |
| <b>Legacy Control</b>   | Old-series contactor, relay and PID logic control systems   |
| <b>SCADA</b>            | System monitoring with analysis                             |

VMC machines

CNC turning centres

Siemens PLC systems

CNC controls &amp; servo drives

## 06 — TRACK RECORD

# Project Record

Thirty-six delivered projects in automation, energy saving, integration and audit.

|    |                                                                                                                               |                 |
|----|-------------------------------------------------------------------------------------------------------------------------------|-----------------|
| 01 | CFS plant Mitsubishi VFD panel — supply, installation, commissioning and integration with pressure & temperature analog logic | BOSCH NAP       |
| 02 | ESP interlock on machine                                                                                                      | BOSCH NAP       |
| 03 | ECO-mode interlock for energy saving                                                                                          | BOSCH NAP       |
| 04 | Poka-yoke project on machine                                                                                                  | BOSCH NAP       |
| 05 | HOP assembly & test line cannibalization work                                                                                 | BOSCH NAP       |
| 06 | Assembly & test line 3 cannibalization                                                                                        | BOSCH NAP       |
| 07 | Energy management system SCADA project — energy meter installation                                                            | BOSCH NAP PJEYM |
| 08 | Kennametal 1.43 machine integration with CFS plant                                                                            | BOSCH NAP       |
| 09 | NOAH line station field I/O configuration and PLC integration                                                                 | BOSCH CHAKAN    |
| 10 | Complete conveyor automation — auto oil & masala spreading on khakhra                                                         | TRUPTI UDYOG    |
| 11 | Energy mapping, analysis and ECO-mode implementation on various machines                                                      | BOSCH NAP       |
| 12 | Part storage rack temperature & humidity control with door alarm system                                                       | BOSCH NAP       |
| 13 | VFD installation on pumps, fans, blowers; chilled-water flow control logic                                                    | BOSCH NAP       |
| 14 | Auto motorised valve control on CFS line — temperature & pressure panel supply and integration                                | BOSCH NAP       |
| 15 | Compressor low air-pressure pre-alarm with SMS via GSM module                                                                 | BOSCH NAP       |
| 16 | NIS system installation & commissioning                                                                                       | —               |
| 17 | Endurance test bench relocation — electrical & mechanical installation and commissioning to OK trial                          | BOSCH NAP       |
| 18 | OPC conveyor of S+B machine — electrical & mechanical installation and commissioning                                          | ATMO            |

|    |                                                                                             |                 |
|----|---------------------------------------------------------------------------------------------|-----------------|
| 19 | APFC panel for power factor correction — supply, installation & commissioning               | ST. FRANCIS     |
| 20 | Lamination machine rubber roll & paper winder — VFD variable speed control logic            | DELIGHT         |
| 21 | Extrusion machine die-zone temperature control via PID logic modification                   | DELIGHT         |
| 22 | Compressed air humidity, temperature & moisture control — heater and auto drain valve logic | DELIGHT         |
| 23 | N54 C2 electrical safety audit — Nashik & Chakan plants                                     | BOSCH           |
| 24 | Energy-saving VFD installation — Bosch Nashik & Chakan, Delight Nashik                      | BOSCH · DELIGHT |
| 25 | Power quality audit                                                                         | —               |
| 26 | Energy audit                                                                                | —               |
| 27 | Electrical safety audit with solution                                                       | —               |
| 28 | Thermography audit with solution                                                            | —               |
| 29 | Meter calibration                                                                           | —               |
| 30 | Vibration analysis with solution                                                            | —               |
| 31 | Whole-plant thermography audit — Ranjangaon                                                 | LG              |
| 32 | Plant shutdown maintenance — Ahmedabad                                                      | SUZUKI          |
| 33 | Assembly test line automation — Pune                                                        | EAGLE BURGMANN  |
| 34 | CSR electrical lab training kit                                                             | MNGL            |
| 35 | Retrofitting — Siemens 840D                                                                 | SUNYOG          |
| 36 | Retrofitting — Siemens 802D                                                                 | JYOTI LTD       |

## 07 — CHECK SHEET

# Machine Preventive Maintenance

Our standard 44-point check sheet, logged per machine and asset number with status and remarks for every point.

## Electrical

22 POINTS

- |    |                                                                |
|----|----------------------------------------------------------------|
| 01 | Incoming 3-phase supply main switch on/off operation           |
| 02 | 24 V DC supply voltage                                         |
| 03 | Earthing resistance & leakage voltage below 5 $\Omega$ / 2.5 V |
| 04 | Panel cooler working condition — temp. monitor 28 °C           |
| 05 | Tighten all power circuit connections — MPCB, MCB, contactor   |
| 06 | PID controller on/off operation                                |
| 07 | Temperature, flow & pressure switch working condition          |
| 08 | Hydraulic, servo & pneumatic valve on/off                      |
| 09 | VFD cooling fan working condition                              |
| 10 | Spindle motor vibration level check                            |
| 11 | Induction motor noise level                                    |
| 12 | Hydraulic motor current                                        |
| 13 | Coolant flow motor working condition                           |
| 14 | Turret motor brake operation                                   |
| 15 | Lubrication motor working condition                            |
| 16 | All motor cooling fans working condition                       |
| 17 | All sensors — analog & digital signal feedback                 |
| 18 | Thermocouple operation                                         |
| 19 | Encoder / tacho feedback                                       |
| 20 | Fire protection circuit working condition                      |
| 21 | Emergency circuit operating condition                          |
| 22 | Terminal power & control connections — replace burnt TBs       |

## Mechanical

22 POINTS

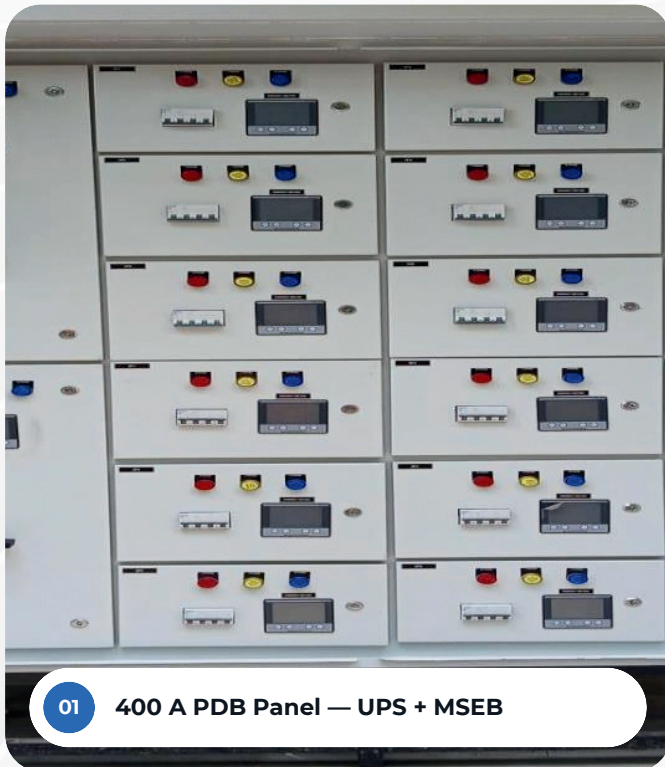

- |    |                                                |
|----|------------------------------------------------|
| 01 | Incoming air pressure $\geq$ 6 bar             |
| 02 | Hydraulic power pack oil level                 |
| 03 | Hydraulic pump output pressure                 |
| 04 | Lubrication pump working condition             |
| 05 | Conveyor gearbox noise                         |
| 06 | Conveyor belt condition                        |
| 07 | Gearbox oiling / greasing                      |
| 08 | Identify and close air leakage points          |
| 09 | All motors vibration check                     |
| 10 | Hydraulic tank oil level — top up if low       |
| 11 | Oil line leakages                              |
| 12 | Hydraulic valve operation                      |
| 13 | Pneumatic valve operation                      |
| 14 | FRL unit working condition                     |
| 15 | Dial gauge pressure set as per standard        |
| 16 | Exhaust system working condition               |
| 17 | Air & oil filter cleaning                      |
| 18 | Brake pad condition — replace if worn          |
| 19 | Door alignment & lock                          |
| 20 | Fire protection air damper on/off operation    |
| 21 | Couplings, pulleys, belts & bearings condition |
| 22 | Foundation nuts & bolts                        |

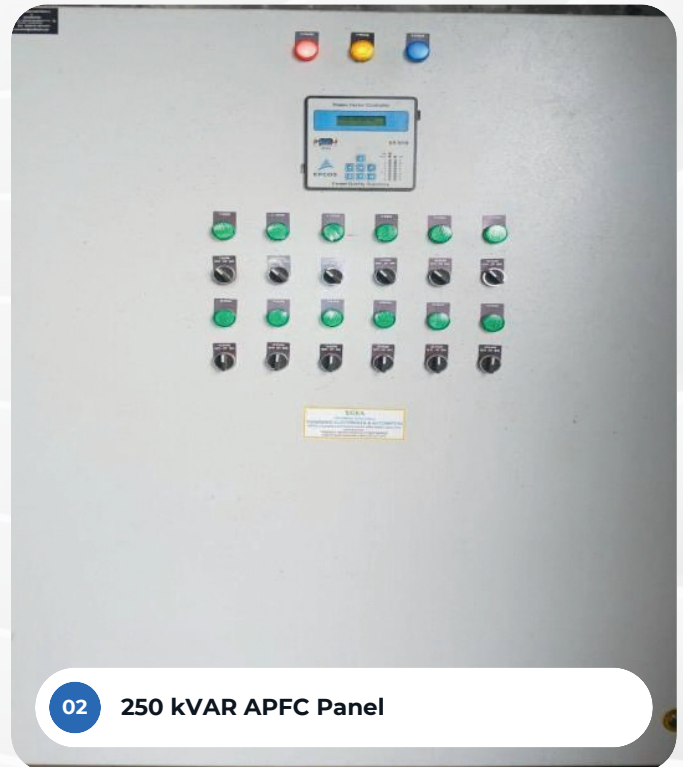

## 08 — PRODUCTS

# Panels We Build

Designed, wired and commissioned in-house — company products and project work.

01 400 A PDB Panel — UPS + MSEB

02 250 kVAR APFC Panel

03 S7-1200 PLC with HMI Panel

04 7.5 / 11 / 15 kW VFD Panel

## 09 — SUPPLY

# Electrical & Automation Material Supply

A comprehensive range of electrical, industrial automation, control panel and machine materials — and anything else your requirement calls for.

- Cable lugs — all types & sizes
- Wires & cables — power, control, flexible
- PVC wire ducts / cable trunking
- Electrical & industrial connectors
- Fuses & fuse holders
- Push buttons & selector switches
- Isolators & switch disconnectors
- Timers, counters & control devices
- Limit switches
- Solenoid valves
- HMI & operator panels
- Stepper motors & drives
- Pneumatic & electro-pneumatic components
- Earthing materials
- Machine electrical & automation parts
- Cable ferrules — pin, twin & insulated
- Terminal blocks & accessories
- Cable ties & cable markers
- Junction boxes & enclosures
- Contactors & overload relays
- Emergency stop push buttons
- SMPS / DC power supplies
- Proximity sensors
- Pressure sensors & switches
- Industrial automation components
- VFD / AC drives
- Encoders
- Panel cooling fans & accessories
- Electrical insulation materials
- Other materials to customer requirement
- Cable glands — brass, nylon & PG
- DIN rails
- Heat-shrink sleeves & tubes
- MCB, MCCB, RCCB & RCBO
- Relays & relay bases
- Indicating / pilot lamps
- Control transformers
- Photoelectric sensors
- Temperature sensors & controllers
- PLC & PLC accessories
- Servo drives & servo motors
- Industrial communication components
- Busbars & busbar accessories
- Control panel accessories
